

Audit Technology Integration Practices (TIPs™)

COMMON_d Audit Technology Integration Practices (TIPs™) will give you a comprehensive collection of usable data to help your organization eliminate unwarranted Telco charges, excessive bandwidth and other wasteful expenditures.

Our methodology will give you a complete analysis of the current state of your network infrastructure and allow a base lining for future development and implementation of your New World converged network infrastructure.

The current market is changing everything. In this economy, competition is growing, margins are shrinking, and organizations are asked to do more for less. Companies must expand service offerings, be more efficient and deliver new solutions quickly without spending additional revenue and resources. COMMON_d will help your organization optimize your current infrastructure and allow you to do more for less by helping you with these critical and important questions:

“What do I have?”

With COMMON_d Audit TIPs™, companies acquire the capabilities they need to examine empirical data from the entire network and all devices within.

“Is it what we pay for?”

COMMON_d Audit TIPs™ will match what you have vs. what you are paying for.

“How efficient is it?”

With the accurate results from COMMON_d Audit TIPs™, you can have an accurate assessment of your network's current health and utilization. In addition, your organization can create a baseline that optimizes current performance and plan for future expansion.

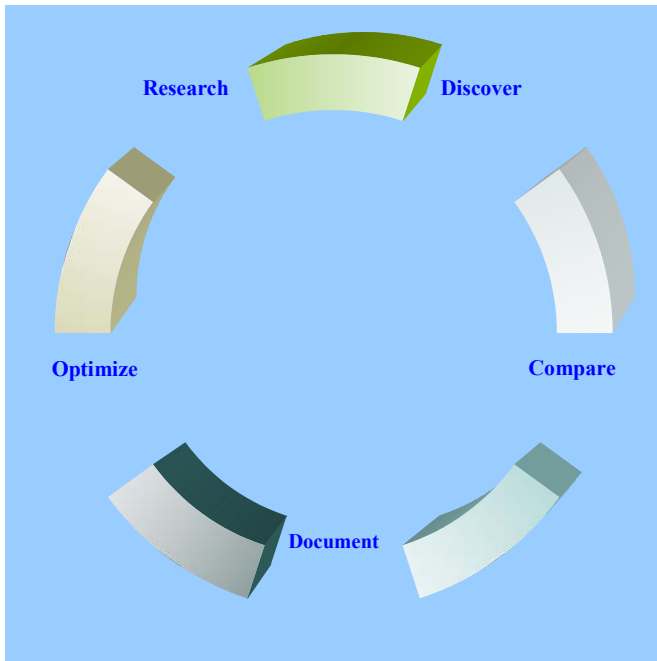

“Can I do more for less?”

COMMON_d Audit TIPs™ can help you thoroughly answer this critical question.

Methodology

Our battle-tested methodology, products, tools and engineers deliver an accurate audit from end-to-end including both Logical and Physical connectivity. We analyze:

- ❑ Service Providers to DMARC.
- ❑ DMARC to facility(s).
- ❑ WAN and Site to Site connectivity.
- ❑ Port to Port.
- ❑ Verification of ownership.
- ❑ Verification of correct provisioning design and assignment of ALL network circuits.
- ❑ Verification of Usage:
 - ✓ Voice
 - ✓ Data
- ❑ Contract Verification.
- ❑ Compare invoices to CSR (verify Rates, SLA, and Service Dates).
- ❑ Complete physical and logical network asset inventory.
- ❑ Detailed representation of the entire network in historical, current/as-built, and future views (when Applicable).
- ❑ Network Utilization.
- ❑ ROI report.

REPORTS:

Our Report Suite will give your organization customization for the following:

- ❑ Complete physical and logical network asset inventory.
- ❑ Detailed representations of the network in historical, current/as-built, and future views (when Applicable).
- ❑ Accurate physical graphics
- ❑ Complete physical network design and documentation including floor plan, rack and cabling views.
- ❑ An accurate central repository of all network data.

BENEFITS

- ❑ Maximizes your return on investment.
- ❑ Identifies problems before they occur.
- ❑ Enables better informed network planning.
- ❑ Accurate information for circuit design, assignment, and management.
- ❑ Increases productivity.
- ❑ Enables optimization of the performance of the network.
- ❑ Provides accurate information for future selection.

WHY COMMON_d

- ❑ **Outstanding People:** We have the very best consultants and professionals the industry has to offer.
- ❑ **Integrity:** We will do what is right, every time.
- ❑ **Excellence in Everything we do:** Excellence in everything we do is about quality and exceeding client expectations during and after the engagement process.
- ❑ **Focus:** Customer First, Last and Always.
- ❑ **Best-in-breed:** COMMON_d Audit TIPS™ guarantees the neutrality of our deliverables. We will give you a consistent and uniform set of service parameters and solutions without the disposition of vendors or brands.
