

Disaster Recovery TIPS™

As security and other cyber threats escalate, computing threats and hostility moves from the pages of spy fiction to the internet, infrastructure disaster recovery has become more and more vital to the well-being of your organization. Through a comprehensive service covers all of the essential phases of Business Continuity planning, we have the proper, simplified and “cost controlled” method to help you mitigate the effects of a disaster and to reestablish normal business operations.

COMMON_d Disaster Recovery Technology Integration Practices (TIPS™) will be a great asset protection mechanism for your organization. COMMON_d Technology Integration Practices (TIPS™) will help you find the right balance between privacy, security, access and cost.

“What do I have?”

With COMMON_d DR TIPS™, your organization will benefit from a comprehensive risk assessment for your asset profile. Our Disaster Recovery TIPS™ will equip you with a safe, practical methodology in addition to a continuous and operational business and IT infrastructure during your emergency mode operation.

“What do we need?”

COMMON_d DR TIPS™ identifies your critical business and IT processes/functions. Our experts will customize tools, services and policies to help you create and maintain your business continuity to minimize loss exposure that could impact your business. COMMON_d's DR Team will provide:

- Vulnerability Assessment and General Definition of Requirements
- Business Impact Analysis
- Detailed Definition of Requirements
- Plan Development
- Testing Program
- Maintenance Program
- Initial Plan Testing and Plan Implementation

“Do you have a response plan for a catastrophic breach of security?”

COMMON_d DR TIPS™ recognizes the importance of this issue. We will help by focusing on the proper strategy, training, and practical strategy; not a plan to “buy more technology”.

“Can I do more for less?”

COMMON_d DR TIPS™ can help you thoroughly answer this critical question.

BENEFITS

- Identifying Risk Profile and Assets
- Assisting with your DR policy development to have a correct contingency plan to address all of your organization's critical functions.
- Establish and develop coordinated-contingency planning efforts with all of your service bureaus.
- Minimize disruption of service to your institutions and customers
