

EMR Technology Integration Practices (TIPs™)

COMMON_d EMR Technology Integration Practices (TIPs™) will give you a comprehensive collection of functional data to help covered entities make the correct decisions about your final selections and implementation.

The competition is growing, margins are shrinking, and covered entities are asked to do more for less. The push and marketing-hype behind EMR has increased over the past few years, and the EMR you select will have a vast impact on your organization.

COMMON_d will help your organization to determine which ones are the most appropriate for you and your organization.

EMR Readiness

Our experts will assess your readiness for an EMR implementation with special attention to specific operational characteristics and corresponding:

1. Work flow and processes analysis
2. Identification of specialty needs and requirements
3. Network infrastructure assessment
4. Interoperability with business associates and other covered entities
5. Identification of security and regulatory requirements

EMR Vendor Selection and Implementation

Our trusted advisors will assist your organization with:

1. Matching the specific the requirements of your organization with potential EMR vendors
2. Validating the performance of the EMR vendors
3. Evaluating, testing (when applicable) and working with the selected vendor to define, design, and deploy for a better transition and better results
4. Infrastructure implementation support
5. Database evaluation, mining, conversion, testing, pilot, and transfer
6. Final database migration
