

Network Management Integration Practices (TIPs™)

COMMON_d Network Management Integration Practices (TIPs™) will give you peace of mind. Our Network Services Management (TIPs™) are designed to monitor the critical health status of devices and applications within your network. Our methodology enables your network to be more manageable and secure by integrating the complete range of computer platforms, applications, services and devices while reducing total cost of ownership for your organization.

The current market is changing everything. In this economy, competition is growing, margins are shrinking, and organizations are asked to do more for less. Companies must create an auditable and manageable infrastructure to demonstrate regulatory compliance and prevent catastrophic loss.

COMMON_d will help your organization optimize your current infrastructure, mitigate threats and IT interruptions to your mission-critical network systems, and allow you to do more for less by helping you with these critical and important questions:

Efficiency

With COMMON_d Network Management TIPs™, companies acquire the capabilities they need to support their networks effectively, promote security and not lose ground on current projects.

ROI

With COMMON_d Network Management TIPs™, your organization will immediately realize return on investment. Allow niche specialists to monitor and correct incidents immediately without diverting your in-house resources.

“Can I do more for less?”

COMMON_d Network Management TIPs™ can help you thoroughly answer this critical question.

BENEFITS

- ❑ Scalable and reliable onsite and offsite management for operations of all sizes
- ❑ Identifies problems before they occur
- ❑ Minimize system downtime
- ❑ Active and spontaneous SSL identification, tracking, and analysis
