

PCI TIPS™

COMMON_d PCI Technology Integration Practices (TIPS™) allows for a solid architecture and network foundation to help your organization address the Payment Card Industry Data Security Standard and requirements.

In September of 2006, American Express, Discover Financial Services, JCB, MasterCard Worldwide, and Visa International jointly announced formation of the PCI Security Standards Council. The DSS is a multifaceted security industry standards body providing management of the Payment Card Industry Data Security Standard on a global basis. COMMON_d experts will assist your organization with the security management, policies, procedures, network architecture, and other critical protective measures to meet the 12 complex requirements of The Payment Card Industry Data Security Standards.

Cyber criminals continue to refine their attack methods. Identity theft and credit card crime are on the rise. Protection of your customer sensitive data and information is one of the most important business issues. This is a significant concern, and the Payment Card Industry Data Security Standard must be a first priority in your business goals and objectives.

“What do I have?”

With COMMON_d PCI TIPS™, your organization will benefit from a comprehensive PCI assessment. Our methodology will equip you with a foundation toward a readiness for the PCI compliance.

“What do we need?”

COMMON_d PCI TIPS™ provides a blueprint for diverse security and a comprehensive network infrastructure that helps retailers and other organizations that accept credit cards address the 12 PCI requirements. It also provides a solid security and protection for your sensitive data and information.

“How do we do it?”

COMMON_d PCI TIPS™ recognizes the importance of this issue. We focus on a proper PCI strategy and a proper network architecture that can be tailored for each organization’s specific requirements—not on a plan to “buy more technology”.

“Can I do more for less?”

COMMON_d PCI TIPS™ can help you thoroughly answer this critical question.

BENEFITS

- ❑ Maximize your return on investment by the delivery of a modular and customized PCI solution.
- ❑ Protect and safeguard your customers’ financial and personal data. Strengthen your eCommerce and shopping security.
- ❑ Minimize identity theft and credit card crimes.
- ❑ Provide better customer service.
- ❑ Ensure brand trust for your organization.
