

SOFT TIPs™

COMMON_d SOFT Technology Integration Practices (TIPs™) COMMON_d's software custom development methodology will improve efficiency, costs & quality throughout the process. Our approach will allow requirements and specifications to evolve as the development project progresses.

COMMON_d's SOFT TIPs™ accommodate requirement changes without spiraling costs out of control. The end result is that your budget, quality and lifecycle objectives are met or exceeded.

Software development is unpredictable and often results in uncontrollable costs and unfinished products.

Furthermore, software is habitually written without careful planning which results in a glued together design of the system from decisions based on short-term factors. This might work well when the system is small, but as your system grows, it becomes increasingly difficult to add, manage and integrate new functions.

“What do I have?”

With COMMON_d SOFT TIPs™, we will produce through requirements for the product. Ideas for possible features, priorities and functionality will be studied carefully in order to guarantee success of the project.

“What do we need?”

Tactical and Strategic goals and objectives, technical requirements, costs, interfaces and resources will be evaluated. This will lead to a successful engagement that has the correct predictability for your organization.

“Can I do more for less?”

Our methodology yields a number of advantages for our clients. You will get a live production early on with capabilities according to your requirements on time and budget.

BENEFITS

COMMON_d's software experience and research has led to an industry leading methodology for efficient software development life cycle design.

Our team and methodology ensure:

- ❑ Your business, technical and growth requirements are met.
- ❑ Your software products are developed in a timely predictable manner.
- ❑ A cost control process for installation of the product is maintained.
- ❑ Problems are found as early as possible in the product's lifecycle.
- ❑ Cost to resolve problems are reduced.
- ❑ Predictable process for future growth.

WHY COMMON_d

- ❑ **Outstanding People:** We have the very best consultants and professionals the industry has to offer.
- ❑ **Integrity:** We will do what is right, every time.
- ❑ **Excellence in Everything we do:** Excellence in everything we do is about quality and exceeding client expectations during and after the engagement process.
- ❑ **Focus:** Customer First, Last and Always.
- ❑ **Best-in-breed:** COMMON_d Security TIPs™ guarantees the neutrality of our deliverables. We will give you a consistent and uniform set of service parameters and solutions.
